Education

Purdue University August, 2021 -

PhD in Computer Science (Advisor - Milind Kulkarni)

Research interests - Compilers, Automatic parallelization, Sparse tensors, High performance computing

Institute of Engineering & Management, Kolkata (MAKAUT) August, 2017 - May, 2021

Bachelor of Technology in Computer Science and Engineering

Awarded the Director's Award for Best Scientific Mind

Experience

Swift Platform Experience - Compiler Intern May, 2023 - August, 2023

Apple

Manager - Richard Wei

- Swift compiler
  - Designed a new Intermediate Representation used internally across multiple teams at Apple.
  - Extended Swift's code generation and runtime to work with this new Intermediate Representation.

Research Assisant August, 2021 - February, 2023

Purdue University

Advisor - Tiark Rompf

- Flare: In-memory query compiler backend for Apache Spark using generative programming
  - Developed a specialized file loader that reduces HDFS overheads by generating file topology aware native code.
  - Embedded a MapReduce-like framework in Flare to operate over files in HDFS.

Google Summer of Code - Student June, 2021 - August, 2021

The LLVM Compiler Infrastructure Organization

Supervisors - William Moses, Johannes Doerfert

- Enzyme: LLVM Pass to perform automatic differentiation of statically analyzable LLVM IR
  - Integrated custom derivatives of several BLAS functions into Enzyme.
  - Wrote an LLVM pass to inline function definitions from bitcode files into LLVM IR.

IRIS-HEP - Fellow June, 2020 - September, 2020

Princeton University

Supervisor - Jim Pivarski

- Awkward Array: Library for nested, variable-sized data using NumPy-like idioms
  - Created a source to source compiler to generate equivalent Python for a subset of C++.
  - Created a property based testing framework.
  - Created a source to source compiler to generate equivalent parallel CUDA from specification (Python and type info).

IRIS-HEP and DIANA-HEP - Fellow June, 2018 - September, 2018; June, 2019 - September, 2019

Fermi National Accelerator Laboratory and Princeton University

Supervisor - Jim Pivarski

- Uproot: Python implementation of ROOT I/O, an open source file format storing over an exabyte of HEP data
  - Enabled writing fundamental HEP data structures like TTrees and histograms to ROOT files.
  - Uproot has become one of the most widely used HEP libraries.

Other Open Source Contributions

Supervisors - Nikos Vasilakis, Konstantinos Kallas February, 2022 - July, 2022

- **PaSh**: A system for parallelizing POSIX shell scripts
  - Helped extend PaSh for distributed file systems (HDFS)

Supervisor - Vassil Vassilev November, 2019 - May, 2021

- **ROOT**: An open-source data analysis framework storing over an exabyte of data
  - Improvements to interpreter (rootcling)
- **Cling**: Interactive C++ interpreter built on top of Clang
  - Maintained cpt.py installer and packager
- **Clang**: C language family frontend for LLVM
  - Several patches to print type information of C++ template arguments

Supervisor - Jim Pivarski — January, 2021 - February, 2021

- **Awkward Array** - Library for nested, variable-sized data using NumPy-like idioms
  - Created a parser for Awkward Array's type system

Supervisors - Jim Pivarski, Viktor Khristenko — June, 2017 - August, 2017

- **spark-root** - Apache Spark datasource for ROOT
  - Separated spark bindings from TTree reading code
- **root4j** - Java implementation of ROOT file reader
  - Optimized codebase to facilitate interoperability

Teaching Experience

CS 354: Operating Systems - Purdue University — Fall 2022, Spring 2023, Fall 2023, Spring 2024
CS 240: Programming in C - Purdue University — Fall 2021, Spring 2022

Programming Languages and Tools

Experienced: Python, C, CUDA
Familiar: C++, Java, Scala, Coq, ROOT, Bash, LaTeX, Swift, WebAssembly

Summer Schools

Oregon Programming Languages Summer School - University of Oregon — 2021
Computational and Data Science for High Energy Physics - Princeton University — 2019

Publications

Invited talks at Conferences

- GSoC Experience - Enzyme (LLVM Developers' Meeting) — 2021
- Python in High Energy Physics (SciPy India, PyCon USA) — 2019, 2020
- Writing files with uproot (PyHEP) — 2019
- Writing files with uproot (ROOT Users' Workshop) — 2018

Invited talks at External Research Group Meetings

- Language Transformations for the Awkward Array library (IRIS-HEP Fellow Presentations) — 2020
- CUDA backend for the Awkward Array project (Princeton University Liberty Research Group) — 2020
- Writing TTrees with uproot (IRIS-HEP Topical Meeting: Summer student project presentations) — 2019
- Writing files with uproot (DIANA Meeting: Updates on ROOT I/O) — 2018
- Separation of Concerns - Refactoring code between ROOT4J and Spark-Root (CMS Big Data Science, DIANA-HEP) — 2017

Service

- Artifact Evaluation Committee - SOSP 2023
